Exterior daylight-visible point with intelligent RGB light

ArchiPoint Powercore, RGB is a daylight-visible, exterior-rated LED point of light ideally suited for a range of direct-view applications. These versatile low-profile luminaires display large-scale video and graphics in a host of settings, including architectural, retail, and entertainment installations. ArchiPoint Powercore, RGB offers high-intensity output with the efficiency and cost-effectiveness of Powercore technology in a rugged, aluminium housing.

- Daylight visible—Outputs up to 25,150 nits of intelligent color light in a weatherproof, low-profile housing, perfect for large-scale video, dynamic effects, and other direct-view applications. Easily visible in brightly lit urban environments and daylight—even in direct sunlight.
- Direct view or illumination—Supports large-scale video for architectural, media façade, and advertising applications for viewing day or night. Indirect illumination delivers high levels of intensity for beacon, paths and marker lighting.
- Multiple mounting base options—Conduit Mounting Base offers side and back openings for flexible connections in surface-mounted installations. Concealed Conduit Mounting Base hides all conduit and wiring behind the mounting surface for a clean look.
- Superior color consistency and accuracy—Optibin, an advanced binning algorithm, sets a new standard for the color consistency and uniformity of LED sources used in manufacturing.
- Flexible installation options—Low-profile luminaires allow for installation in spaces too tight for conventional spotlights. Multiple mounting base options offer flexibility in a wide range of installation types and situations.
- Integrates Powercore technology—Powercore delivers line voltage and data to luminaires over a single cable, dramatically simplifying installation and lowering total system cost. Color Kinetics Data Enabler Pro merges line voltage and control data and delivers them to the luminaire over a single cable, dramatically simplifying installation and lowering total system cost.
- Universal power input range—Accepts a universal power input range of 100 to 240 VAC for consistent installation anywhere in the world. Each Data Enabler Pro can support multiple luminaires for creating long runs of intricately changing color.
- Works seamlessly with the complete Color Kinetics line of controllers, including iPlayer 3, iPlayer 4, Antumbra iColor Keypad, and ColorDial Pro, or third-party controllers.
- Outdoor rated—Fully sealed for maximum luminaire life and IP66-rated for outdoor applications.

Lumen Maintenance

Threshold§	Ambient Temperature		Reported ¶¶	Calculated ¶¶
L 70	25 °C		70,000	
	50 °C		40,000	
L 50	25 °C		100,000	
	50 °C		70,000	

† Lumen output measurements comply with IES LM-79-08 testing procedures.

§ Lxx = xx% lumen maintenance (when light output drops below xx% of initial output). All values are given at B10, or the median value where 90% of the LED population is better than the reported or calculated lumen maintenance measurement.

¶ Minimum surge limits per IEC 61547, tested in accordance with IEC 61000-4-5.

¶¶ Lumen maintenance figures are based on lifetime prediction graphs supplied by LED source manufacturers. Whenever possible, figures use measurements that comply with IES LM-80-08 testing procedures. In accordance with TM-21-11, Reported values represent the interpolated value based on six times the LM-80-08 total test duration (in hours). Calculated values represent time durations that exceed six times the total test duration.
