Premium interior concealed linear luminaire with intelligent RGBA light

Innovative PureStyle Powercore luminaires bring lighting professionals high output in a compact, easily concealed luminaire. PureStyle delivers exceptionally high-quality light for a wide range of interior applications from cove to wall-washing to backlighting and beyond. Here are just some of the powerful advantages that PureStyle brings to lighting professionals and their clients.

- Unbeatable Performance—Major innovations, including a unique optical cluster, enable PureStyle to deliver up to 800 lumens – all with superior beam quality that delivers bright, smooth light.
- Innovative Design — With its compact size and an extremely short mixing distance, PureStyle can excel in areas where traditional linear luminaires are impractical. It's available in 305 mm (1 ft) and 1219 mm (4 ft) aluminium housings, as well as a range of beam angles – including wide (100° x 100°), medium (30° x 60°), and narrow (10° x 60°). Interlocking connectors ensure end-to-end installation without visible light scalloping between luminaires – just pure, seamless light.
- Exceptional Light - All PureStyle luminaires deliver exceptional light. For applications requiring an emphasis on the orange/gold/red area of the color spectrum, we offer PureStyle iColor Powercore, RGBA.
- Superior Color Consistency — Optibin, our proprietary binning optimization process, guarantees uniformity and consistency of hue across LEDs, luminaires, and manufacturing runs.
- Industry-Leading Controls — PureStyle luminaires work seamlessly with the complete Color Kinetics line of controllers, including iPlayer 3, Light System Manager, and ColorDial Pro – as well as third-party controllers.
- Higher Efficiency, Lower Cost — All PureStyle luminaires integrate Powercore technology, which controls power output to luminaires directly from line voltage – rapidly, efficiently, and accurately. The Color Kinetics Data Enabler Pro merges line voltage with control, and delivers them to the luminaire over a single standard cable – simplifying installation dramatically and lowering total system cost.
- Easy Installation — PureStyle luminaires accept power input of 100 to 277 VAC for consistent installation anywhere in the world. Powercore allows long runs and eliminates the need for special wiring and external power supplies. For example, special connectors enable PureStyle luminaires to be connected directly (using jumper cables) with leader cables or with the terminator.

† Lumen measurement complies with IES LM-79-08 testing procedures.

§ L_x = 50% lumen maintenance (when light output drops below 50% of initial output). All values are given at B10, or the median value where 90% of the LED population is better than the reported or calculated lumen maintenance measurement.

¶ Minimum surge limits per IEC 61547, tested in accordance with IEC 61000-4-5.

¶¶ Lumen maintenance figures are based on lifetime prediction graphs supplied by LED source manufacturers. Whenever possible, figures use measurements that comply with IES LM-80-08 testing procedures. In accordance with TM-21-11, Reported values represent the interpolated value based on six times the LM-80-08 total test duration (in hours). Calculated values represent time durations that exceed six times the total test duration.
